10.5.2004

Dear Liz,

I hope this letter finds you well. Enclosed please find CD-Rom with photos from Paris-Dakar 2004, Martin Macik team. LIAZ truck. The other photos are taken by Tomas Spacek during his 2003 trip on a BMW motorbike through South America mountains. We had the pleasure to co-sponsor his trip.

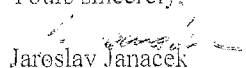

Martin Macik used XHD version in his support truck (racing truck was not treated due to the new inflation system). The support truck finished the whole rally, and I heard from Mr. Macik that the crew witnessed a situation when Ultraseal sealed a puncture caused possibly by a stone. The crew finished the whole race on one set of Michelin tires, without any downtime due to a tire failure.

In addition, Mr. Macik uses the Commercial Grade in his Jeep racing in CZ Off Road Marathon Championship 2004, so far, he is leading the overall ranking after three races.

Tomas Spacek treated his heavily loaded BMW (2 people and equipment). Continental enduro tubeless tires, for rough off road conditions in South America where he had driven over 8500 km without any flat. He is still using these tires back in CZ, tires now exceeded 14 000 km.

I hope we will have a reference letter from Mr. Macik soon.

Yours sincerely,

  
Jaroslav Janacek
