ULTRASEAL PUNCTURE PREVENTION TREATMENT

I would just like to thank you for installing your product into my tyres before my trip to the south of Spain - little did I know just how much I would be needing it!

To explain further, my wife and I stopped at the traffic lights just south of Madrid, when a young lad came from nowhere and started shouting to us that we had a puncture. I quickly realised that he had actually punctured the side wall with a knife, and it was that that was making the hissing noise he was trying to draw our attention to. Obviously, his intentions were not exactly honourable.

Without thinking I just stuck my foot down. I didn't even have time to realise that everything was going to be alright because of Ultraseal - I just wanted to get away from a potentially dangerous situation i.e., a young lad with a knife.

Owing to the vehicle feeling a little unstable after about 40-50 miles I decided to stop and take a look at the damage. The Ultraseal was bubbling out of the wound in the side wall (approximately 1" long) and the tyre looked like it had lost about half of its air.

Upon reflection, I have had time to realise the consequences of NOT having Ultraseal in my tyres on my camper van. I dread to think what would have happened should the tyre have gone flat by the traffic lights where the incident occurred. I am deeply thankful, and greatly impressed by the fact that I had you come and install the product into my tyres before I left. I will never go anywhere again without Ultraseal in my tyres - whatever vehicle I am in.

Once again Phil, many thanks for introducing me to your product which potentially saved my life!

I look forward to meeting with you again in the future.

Best regards,

Yours sincerely

Joe Green
