Dear Sirs,

I would like to express my admiration of your product. My company car is a Volvo S40 which is fitted with Pirelli 6000 205 / 50 x 15 tyres, in the first 28000 miles this car consumed 7 tyres, 2 were lost to punctures by nails penetrating the tyres in areas where it was unsafe to make a repair, the other was lost when the tyre punctured and I was unable to stop immediately due to safety reasons. When a complete new set of tyres were fitted at 28000 miles I introduced Utraseal tyre sealant from the off. I have just changed this set of tyres at 67000 miles having experienced a nail in the front tyre at 61000 miles which I just pulled out and carried on driving. I never seem to need to put air into the tyres when carrying out weekly inspections. A great product that really works and saves money long term.

Yours Sincerely,

  
Neil Smy  
General Manager
