1100 N. Wilcox Avenue  
Los Angeles, CA 90038

Dear Ms. Aguirre,

My name is O.J. Miller and I am writing to let you know the results that we have experienced with the use of your tire sealant, Ultraseal.

I wanted to see if your product would do what you claimed it would, such as allowing the tires to run cooler. So I treated one of the big rigs that hauls coal down some pretty steep grades. These trailers carry as much as seventy tons of weight on them, and the tires get so hot that they are destroyed by the high temperatures that they are exposed to.

So we put your product to the test. When we got at the bottom of the grade, we pulled over and checked the tires with an infrared heat sensor gun and let me tell you "you've made a believer out of me". The tires ran up to 35 degrees cooler, plus we have seen a vast reduction in flat tires.

Heat is a tire's worst enemy. Therefore, I understand why you named your product Ultraseal Tire Life Extender/sealer. By allowing tires to run cooler, the life of the tire will definitely be extended.

Therefore, I would not hesitate to recommend the use of Ultraseal to anyone.

Sincerely,

O.J. Miller  
Vice President,
